## NDE

Wireless lock with  
ENGAGE™ technology

### Overview

The Schlage® NDE wireless cylindrical lock with ENGAGE™ technology is designed to affordably extend electronic access control deeper into the building beyond traditional perimeter and high security openings. Whether commercial real estate, K-12, higher education, assisted living, medical offices, or multi-family, nearly any facility can benefit from the enhanced security, efficiency, and convenience of upgrading to electronic credentials.

NDE wireless locks simplify installation by combining the lock, credential reader, door position sensor and request-to-exit switch all in one unit. NDE wireless locks utilize standard ND cylindrical door prep and can be installed in minutes with only a Phillips screwdriver; no need to install additional components, drill holes or run wires to each opening. NDE suites with the most popular Schlage ND levers, keyways, and finishes, providing attractive options to meet the requirements of nearly any facility. NDE is ideal for office and suite entries, conference rooms, common area doors, resident units, and sensitive storage areas with a cylindrical door prep.

Built-in Bluetooth® enables NDE wireless locks to connect directly to smart phones and tablets; no need for a proprietary handheld device for set-up and configuration. And with built-in Wi-Fi, NDE locks can connect directly to an existing Wi-Fi network enabling automatic updates to lock configuration and user access. With the ENGAGE cloud-based web and mobile apps, it's easy to configure lock settings, add users, and view audits and alerts from anywhere.

For advanced capabilities including networked real-time communication with the ENGAGE™ Gateway, NDE wireless locks can be managed with software from one of our access control alliance members. For additional details, please refer to the NDE Integrations found in the Alliances menu on our website at [us.allegion.com](http://us.allegion.com).

NDE wireless locks are compatible with most proximity and smart cards including aptiQ™ and aptiQmobile.™

### Features and benefits

- Designed to be easy to install, connect, manage, and use
- Fits mechanical ND door prep with no additional holes
- Installs in minutes with only a Phillips screwdriver
- Weather resistant design for use on perimeter doors
- Lever handing is field reversible in seconds; no tools required
- Innovative integrated door position sensor requires no additional door prep
- Built-in Bluetooth® enables wireless configuration from smart phones and tablets
- Built-in Wi-Fi® enables automatic daily updates sent directly from host software
- Enables networked real-time communication with the ENGAGE Gateway and software alliances
- Up to 2 years of battery life
- Compatible with major brands of key systems
- ANSI/BHMA A156.25 (Indoor/Outdoor), ANSI/BHMA Grade 1, UL 294, UL10C, FCC Part 15, ADA, RoHS, Industry Canada (IC)
